AHWAZ FIELD-BANGESTAN RESERVOIR GENERAL SPECIFICATIONS

- ❑ Considering the reservoir performance and the fact that the recoverable reserve is very low comparing to very high amount of oil in place, **it is suggested that new full field studies with the aim of determining optimum production mechanism, possibility of using EOR methods and IOR methods (such as gas lift with respect to wells water cut, installation of down-hole pumps and hydraulic fracturing) being investigated.**
- ❑ A comprehensive study of the field has been done by NISOC recently.

Field	STOIP	Cumulative Production (Up to Now)	Current Production	Total Estimated Production
	MMBbl	MMBbl	MBbl/d	MBbl/d
