رزومه شخصی

(Shabekeh Afzar Company (SAC
September 2019 - Present
Professor's Assistant

my previous experiences as an MIT university, PHD graduated student, Dr.Siavash Esmaeli's assistant in inventing new type of smart glasses have given me the expertise to design highly efficient technologies and solutions for using Renewable Energies. Our project with Dr.esmaeli was inventing new type of glasses, which are able to absorb solar energy during daylight and release it at night, and these glasses are absolutely insulated against any outside and inside sound and also insulated against inside heat. These glasses are also insulated against any desirable frequency of light. We have also invented a soluble plastic, which can dissolute in water and soil without making any harm to ecosystem

Sales & Marketing Manager at Dana Insurance
Representative

September 2017 up to Present

Research Assistant and Construction Laboratory
Device at Drilling Department in Ariya Pazhohesh
(Alpha Co., Ltd (APACO

October 2017 – November 2017

Technical Manager at Petro Irsa Niko Ltd

(October 2017 - February 2018 (1 year

Research Assistant at Department of Reservoir Rock
Properties Technology in Research Institute of

(Petroleum Industry (RIPI

(September 2016 - March 2017 (6 Month

Job duty: Performing experiments on the properties of the reservoir rock in the core analysis such as obtaining oil saturation, water saturation, saturation of irreducible water, gas-oil ratio saturation, permeability, relative permeability, wettability and all experiments of Rcal and Scal Lab

Work in Grocery as an Accountant and Shopkeeper

April 2014 – September 2014

Coaching and Mentoring

up to present 2011
